Library, U.S. Dept. of Agriculture Washington, 25, D.C.

GENERAL INFORMATION ON ORDERING

We ship out only strong started plants with good roots. We do not sell cuttings of any kind. Our plants are husky pot plants, lots of roots and ready to grow fast. They are ready for the flower bed outside or 4" pots inside. Each plant is shipped planted in a 3" composition pot. You get 10 pounds compost soil in each 12 pots. Upon arrival they should be watered thoroughly and placed in a light shady window for two or three days to recover from the shock of travel.

Please specify 3 or 4 substitutions as many varieties are always in propagating beds and may not be ready for shipment when your order arrives. We may delay shipment for three or four weeks in order to give you stronger plants but we will notify you when shipment will be made. We start shipping plants for spring season about March 15th if weather permits. We cannot accept an order for less than \$2.00. Remittance must accompany order. No C.O.D. shipments.

Order as early as you can. Specify shipping date.

We cannot accept any responsibility for damage in transit. Make claim immediately on carrier.

Plants can be shipped much better in multiples of 6 or 12 properly packed in special containers to fit them. Try to order this way.

Plants shipped parcel post prepaid in 1st and 2nd zone. By express collect to all other points. Shipping weight 12 pounds per 12 plants.

All plants labeled on pot. Check list catalogue and planting instructions enclosed in each order.

- On all Geraniums the leaves may turn yellow on long or delayed shipments. Some leaves will recover but new shoots will form quickly at all leaf joints and make a better and bushier plant.
 - Try to visit our greenhouses any day of the week except Monday, Tuesday and Wednesday, between 9 A.M. and 5:00 P.M. during Spring season and select your own plants in bloom from thousands. We have tried to make this hobby the largest and best in the Eastern United States. Come early before shipments deplete our collection for the season.

DIRECTIONS - Hightstown is on Route 25, use Route 1 from Philadelphia or N. Y. City to junction point where Route 25 joins it. Go to Peddle School on Main Street in Hightstown and turn off Main Street onto Etra Rd. Our place is on the right about 1000 feet from Main Street. Watch for our sign.

This catalogue cancels all previous price lists.

GERANIUM PLANT FOOD

Geraniums grow fast and are heavy feeders. Soil in pots is soon exhausted unless replenished by complete plant food. Too much Nitrogen makes weak spindly growth. We have tried all kinds of fertilizer formulas but this one is the best for sturdy plants, lots of side shoots and flower branches. It is mostly organic material and will not burn if properly used. It brings blossoms out in their true clear bright colors and intensifies the color. It corrects soil condition and frees valuable plant food. It works best when scratched into surface soil of pots. Stops mold and moss from forming. 8 ounce can postpaid...60¢

| | Rosebud Type | • 60 |
| 252 | PIGMY | |
| | Tiny plant, with miniature cherry red | * |
| | flowers and pretty light green zoned leaves. | |
| | Smallest of all zonales. 1 inch plants 1 | .00 |

HYDRANGEA FLOWERED ZONALES

This beautiful class of Geraniums is the result of our hybridizing program last year. The outstanding feature - huge umbels of flowers held high above foliage on long stiff stems like Hydrangeas. Clusters of flowers 10 inches in diameter are not uncommon. Individual florets $2\frac{1}{2}$ " across are semi-double or single. Plants grow large and healthy. All colors are exceptionally clear and clean and all blend together to make magnificent cut flower bouquets and corsages. 3" pot plants of this class will be very scarce this year until we have time to propagate further.

| H 30 0 | PAT AUDETTE | |
|--------|--|------|
| | The leader and forerunner of this class and | |
| | probably the largest flowered. Color light | |
| | mauve pink with clean white center. Huge | |

HAVE FUN GROWING GERANIUMS FROM SEED

Each year we offer prizes to any one who raises an outstanding variety of Geranium from seed purchased from us. It's lots of fun to watch these seeds develop into sturdy blooming plants in about 6 months.

Our contest is just for fun with no hard and fast rules. We are always anxious to add new varieties to our ever growing list. We would be glad to pay \$25.00 for the finest outstanding variety produced each year from our seed and \$5.00 each for the next 10 best varieties. We have over 200 varieties on hand now and we are to be the sole judge as to whether your specimen is sufficiently different from these to merit a prize. The names to be given to the prize winners can be selected by the ones who grew them. All prize winning plants become our property. All outstanding varieties up to 11 in number to be awarded \$5.00 prizes when accepted by us. When all are in we will then judge them all and select the best one and award the additional \$20.00 in prizes. This contest ends March 1st, 1950. All winners will be listed in our next catalogue.

All plants competing for prizes must be brought to our greenhouses when in bloom in order to be properly judged. We cannot be responsible for plants shipped in by common carrier.

We will reserve for all prize winners a 3" pot plant of their variety "free of charge" after the stock plant has been propagated and we have at least 10 cuttings.

Special packet of finest mixed Geranium seeds (about 35 seeds) $50 \neq$ postpaid. Cultural sheet accompanies each order.
